FUNNEL OVERVIEW

Total Contacted
41K

Overall Conversion Rate %
11.27%

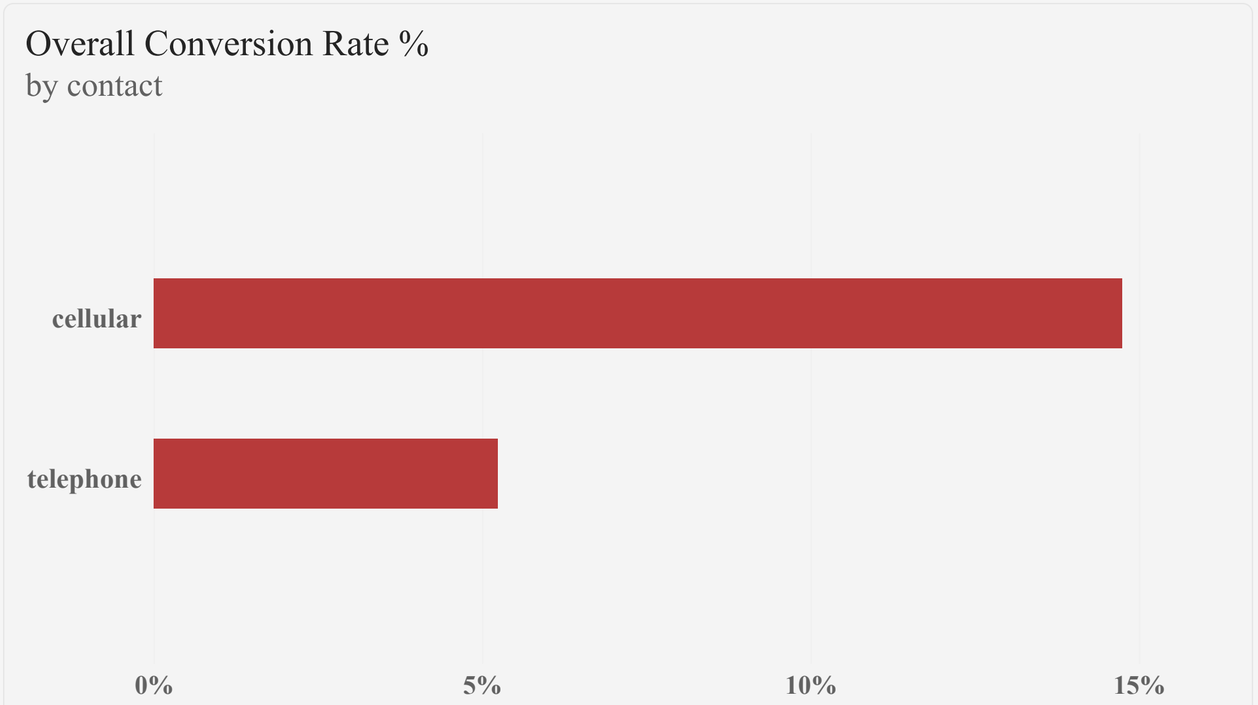

Engagement Rate %
59.11%

Sum of Count
by Stage

The campaign achieved strong engagement at 59.11%, but only 11.27% of contacted users converted, highlighting a significant opportunity to improve lead nurturing and conversion.

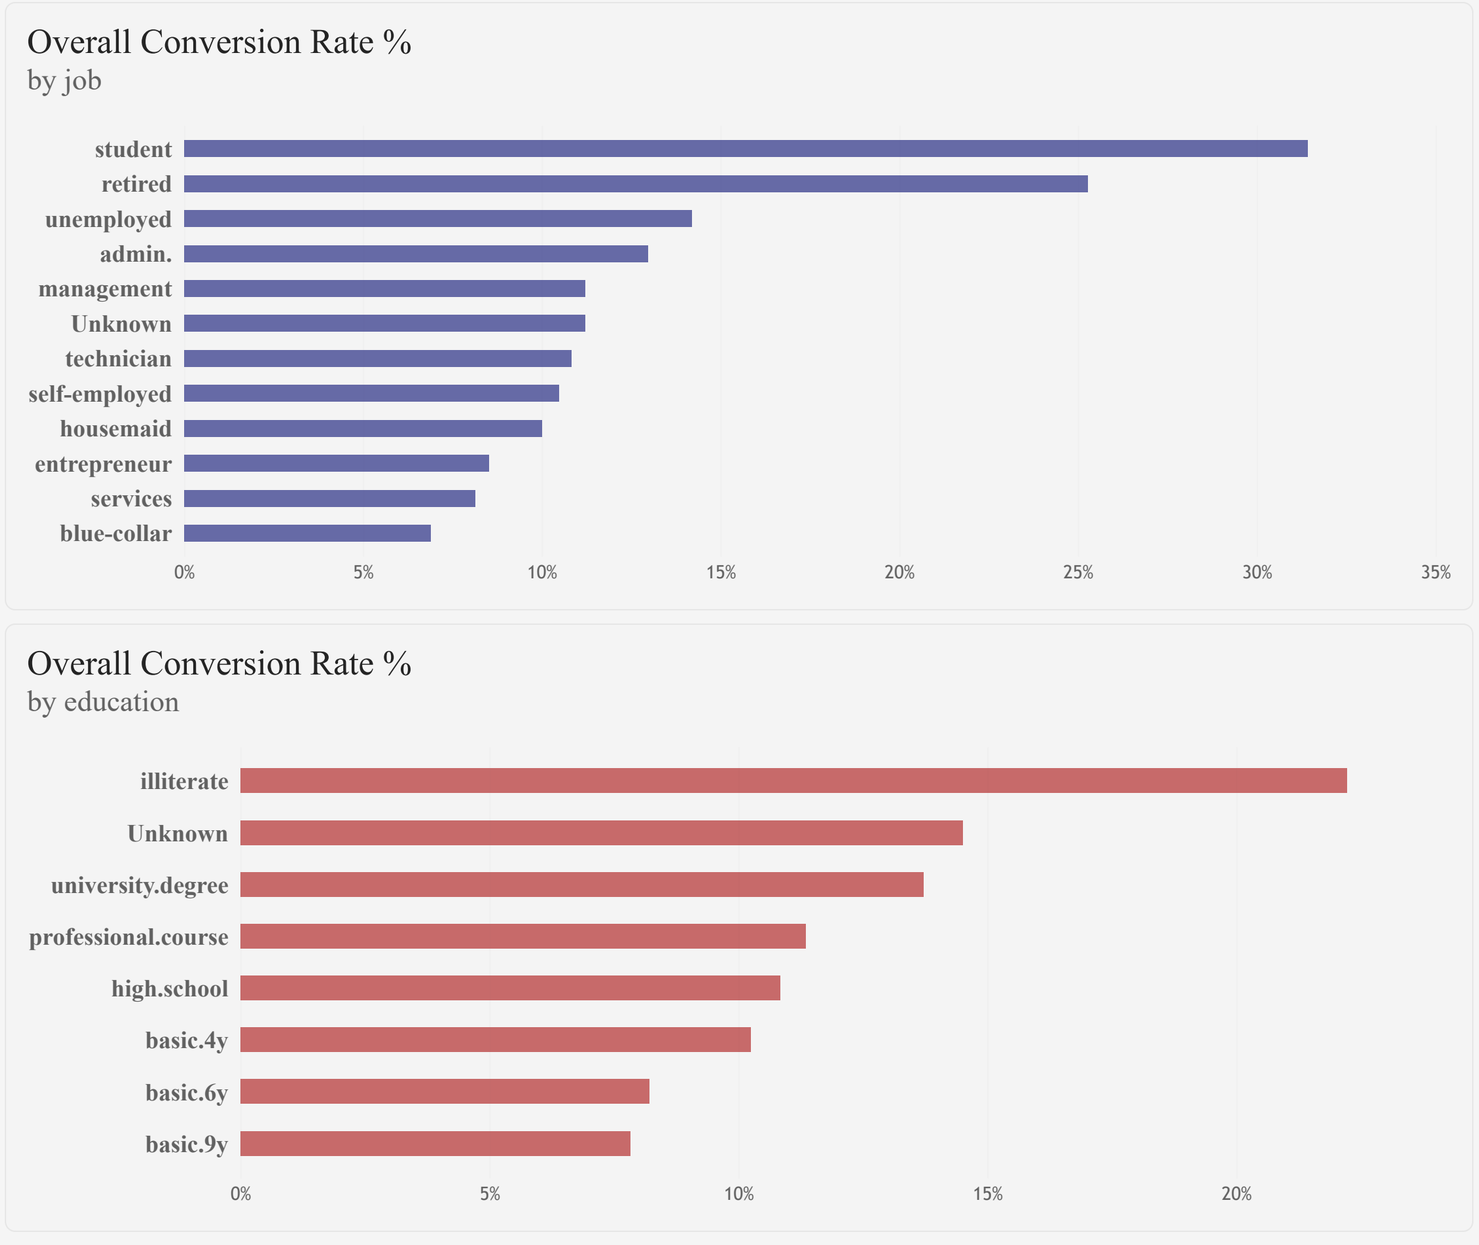

CHANNEL PERFORMANCE

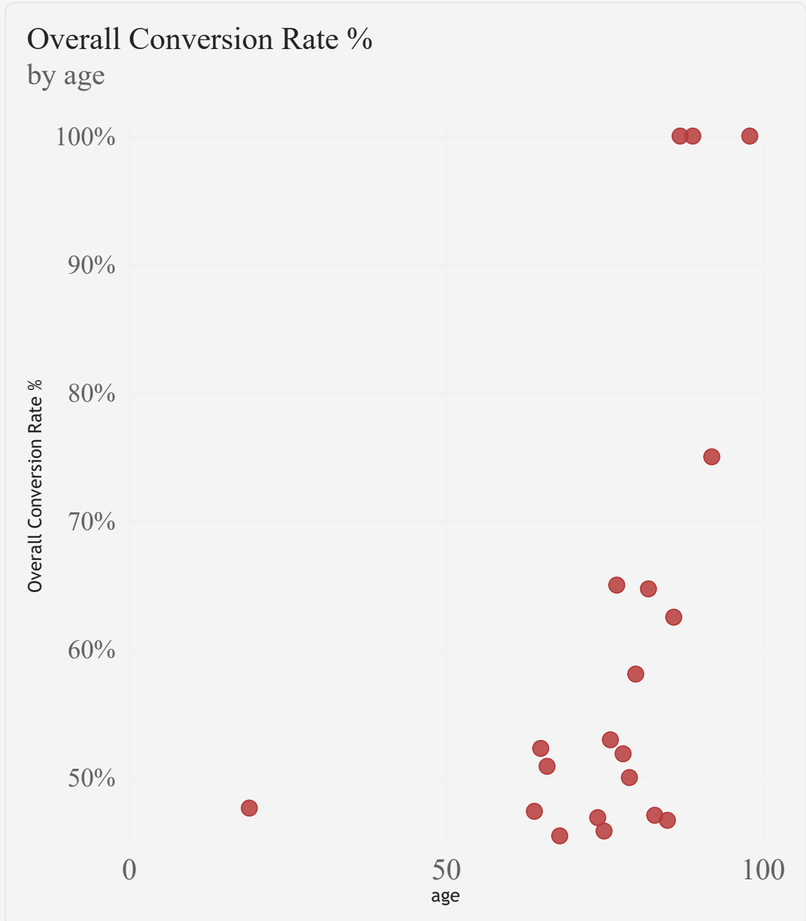

month	Total Contacted	Overall Conversion Rate %
apr	2631	20.49%
aug	6176	10.61%
dec	182	48.90%
jul	7169	9.04%
jun	5318	10.51%
mar	546	50.55%
may	13767	6.44%
nov	4100	10.15%
oct	717	43.93%
sep	570	44.91%
Total	**41176**	**11.27%**

Conversion performance varies significantly across channels. Some channels generate much higher conversion rates than others, indicating that channel-level targeting and optimization can improve overall campaign performance.

DEMOGRAPHIC AND SEGMENT DRIVERS

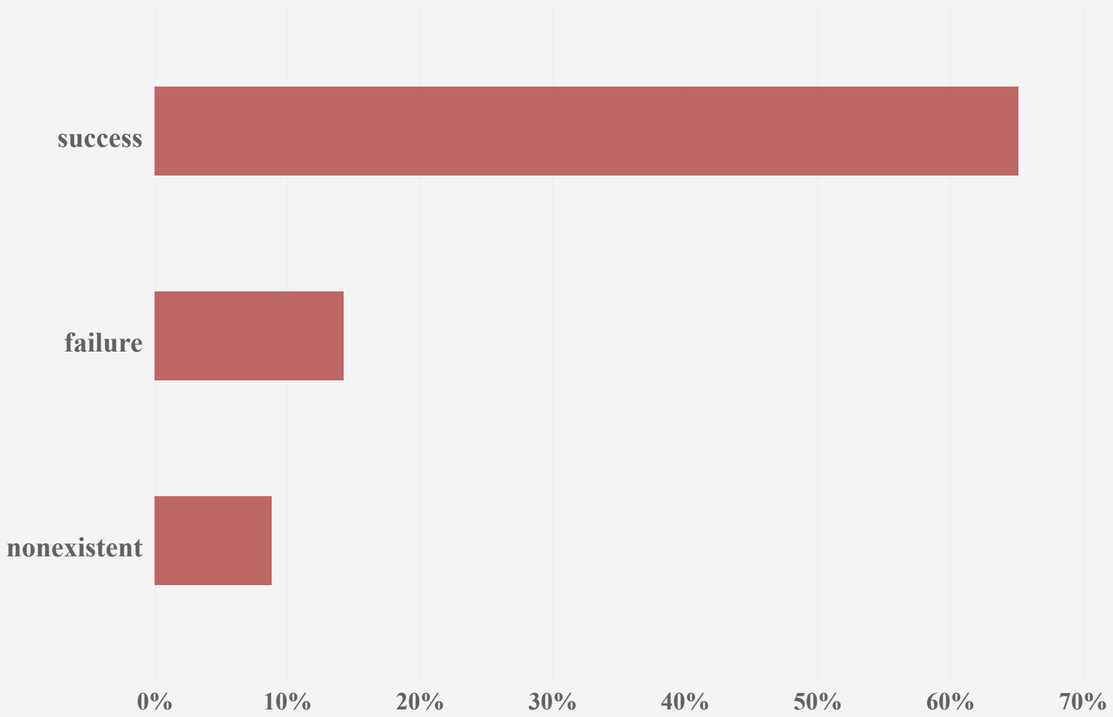

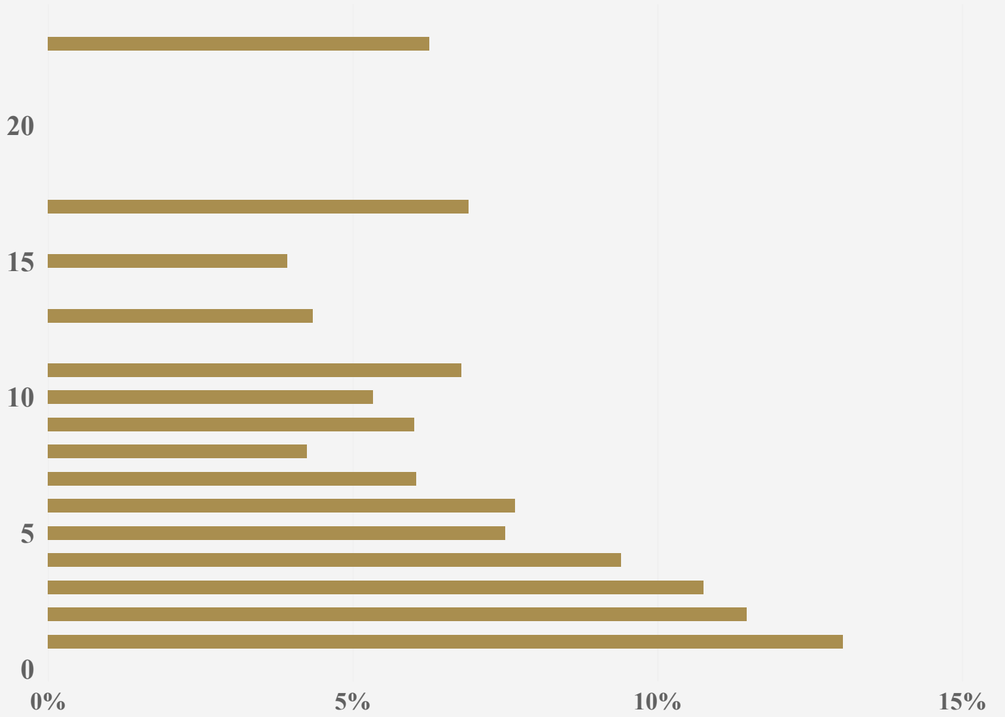

Conversion rates vary across different age groups and education levels, showing that audience characteristics influence campaign performance. These segments can be analyzed further to improve targeting

PREVIOUS CAMPAIGN INFLUENCE

Overall Conversion Rate %
by poutcome

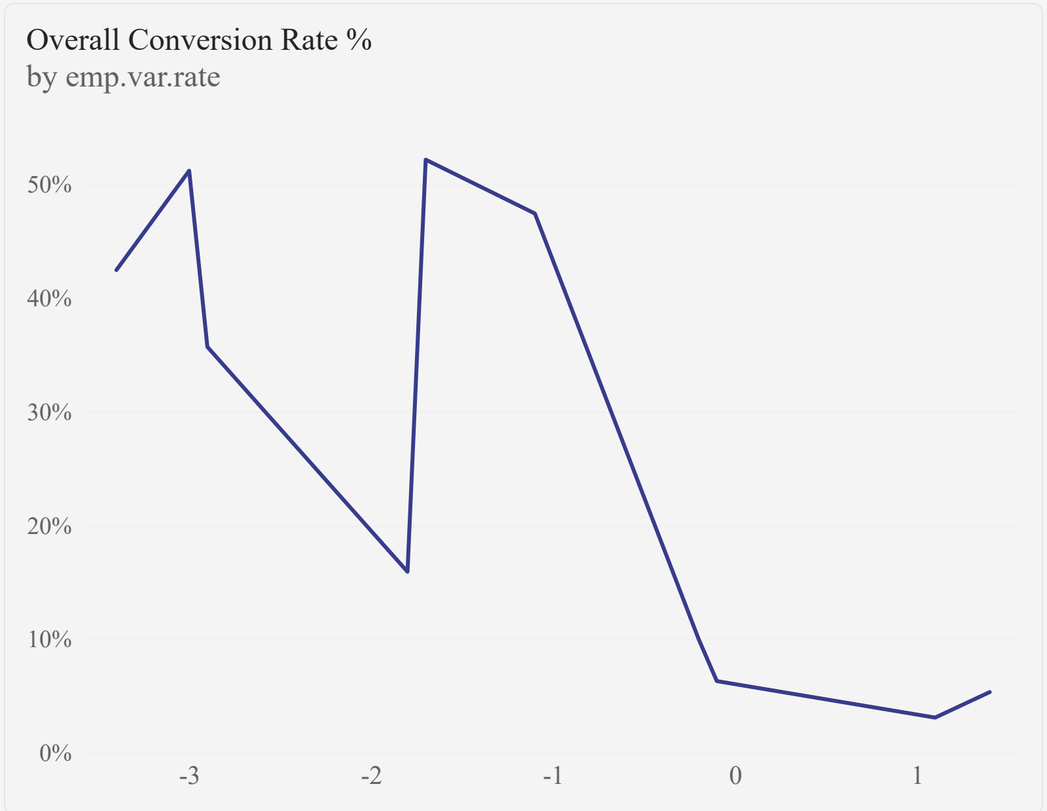

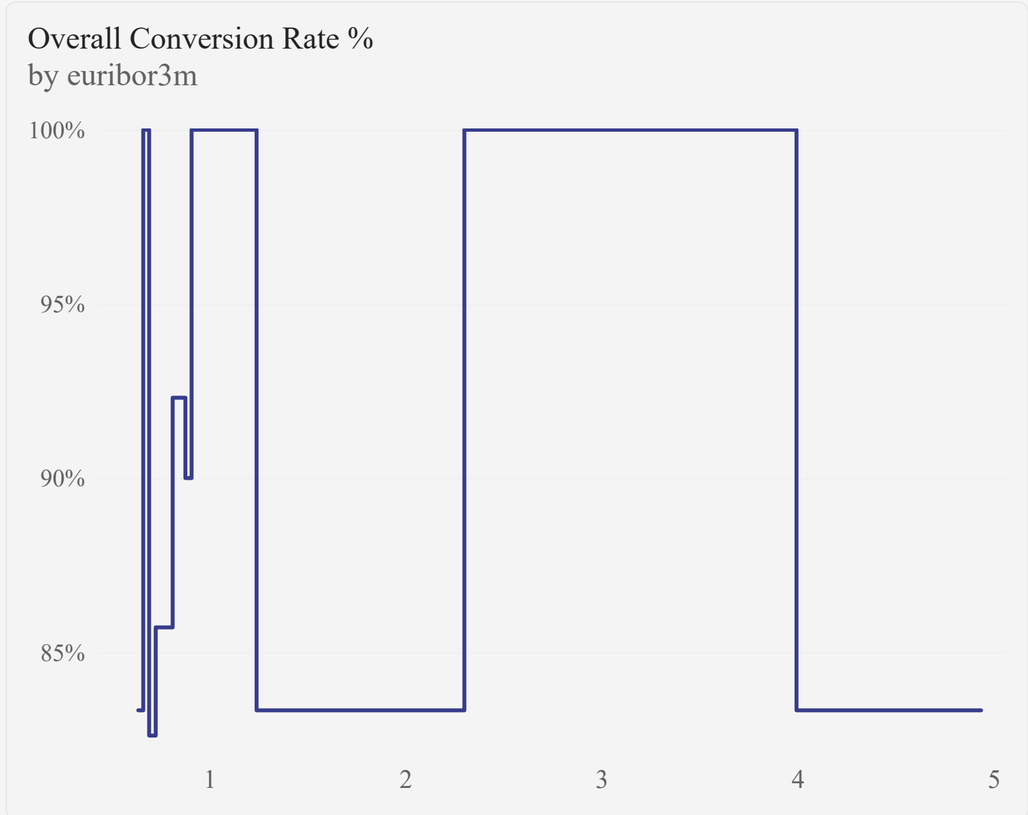

Overall Conversion Rate %
by campaign

Prior campaign outcome is the single strongest predictor of conversion in this dataset. Customers whose previous campaign was a **success convert at ~65%** — roughly 5x higher than those with a previous failure (~15%) and 6x higher than those with no prior contact history (~10%). This means the customer's history with the bank matters far more than any single campaign variable tested elsewhere in this dashboard.

ECONOMIC CONTEXT

Conversion rates fluctuate significantly across the observed periods, with clear peaks and declines. This suggests that campaign performance changes over time and should be monitored to identify periods of stronger conversion
